SAIRS/Quantum's Stone Detection Solution utilizes cutting-edge AI technology to capture every square foot of ground with geotagging cameras mounted on your drill.

It **identifies fieldstones** for accurate mapping with AI image processing and generate easy-to-use GPX maps for seamless integration with Garmin devices.

SAIRS provides advanced agricultural imaging services for agronomists, farmers, and researchers using drones and ground-based techniques. We bridge emerging technologies with agricultural producers, ensuring seamless solution integration for large-acre grain operations.

Quantum is a global technology partner, delivering solutions tailored to solve business challenges.

OUR PARTNERS

BENEFITS

- 1 Decrease Time Spent on Stone Picking
- 2 Cleaner Fields
- 3 Reduce Picker & Combine Operator Fatigue
- 4 Optimal Picking Results even with Inexperienced Operators
- 5 Fewer Stone Mishaps with Machinery
